*Happy
&
Easter*

HEAR FROM THE HEADMASTER

SPCS Family,

Easter Break is here, and I want to take a moment to express my deep gratitude for our wonderful school community. Thank you for your continued support of our students and staff.

When we return on Tuesday, students will begin the annual SAT testing period. It is very important that students get a good night's sleep, eat a healthy breakfast, and arrive at school on time. We want them to feel relaxed and not rushed in order for them to do their best and appreciate your help.

"Praise be to the God and Father of our Lord Jesus Christ! In his great mercy, he has given us new birth into a living hope through the resurrection of Jesus Christ from the dead." 1 Peter 1:3

Wishing everyone a safe and Happy Easter!

Bobby Hunter

UPCOMING EVENTS

NO SCHOOL - Easter Monday
4/6/26

SAT Testing
4/7-10/26

Elementary Talent Show
4/8/26

NO SCHOOL - Pro-Ed Day
5/1/26

Easter SERVICE

We gathered as a school community to celebrate the Resurrection. In praise and worship, celebrating victory over sin and death, fulfilling God's promise, and offering hope for eternal life. Thank you to all of the families that joined us too!

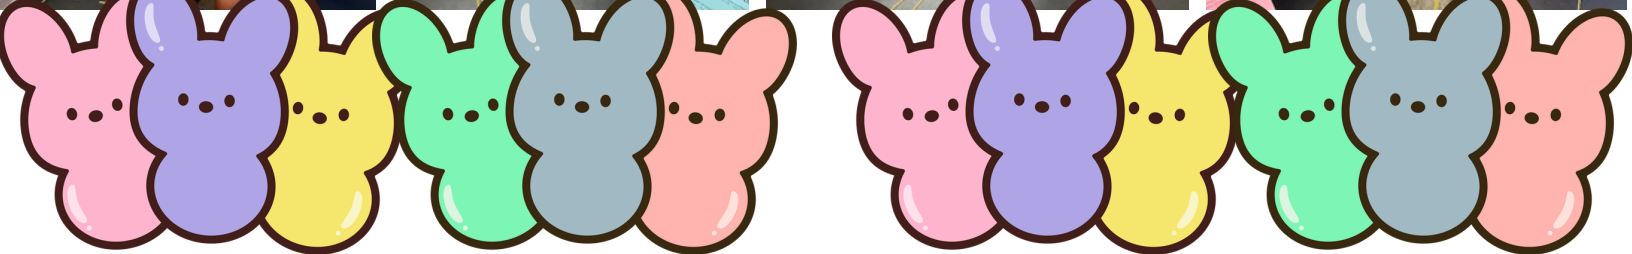

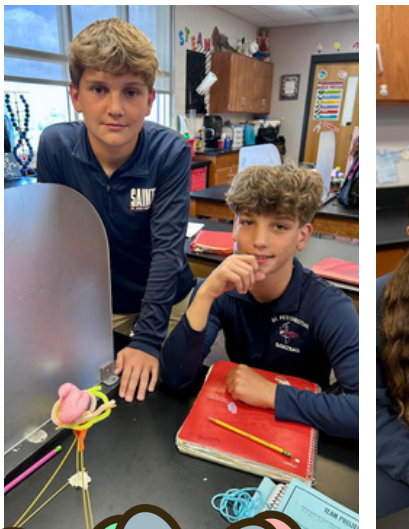

EASTER

MIDDLE SCHOOL EASTER STEM LABS

Our middle schoolers celebrated the start of Spring with Easter STEM labs, including the Easter Basket Bounce and Operation Peep Rescue. The Peep bunny had to save members of Peepsville using physics or build a Peeps nest that was sturdy and stable. They were able to be creative and apply their Science skills through these fun lab activities.

To School ON TIME

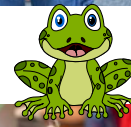

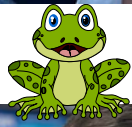

6TH GRADE SCIENCE

The sixth graders are working on their unit of study on meteorology. Students participated in a lab to learn about weather tools. Lab groups created anemometers to track wind speed and calculate the revolutions per minute of their devices. They enjoyed a spring day and learned about all aspects of weather forecasting.

7TH GRADE SCIENCE

Our 7th grade middle school students participated in their fifth dissection of the school year. Students have studied the anatomy and physiology of frogs. With lab partners, students were able to explore these complex organisms. This dissection allowed them to explore differences between vertebrates and invertebrates and how specialized features enable them to be successful in their habitat.

5TH GRADE FIELD TRIP

Fifth grade students went to Busch Gardens for the Animal Environment educational program. They discovered amazing animals and the habitats where they live. They got to stay and play when the learning was done!

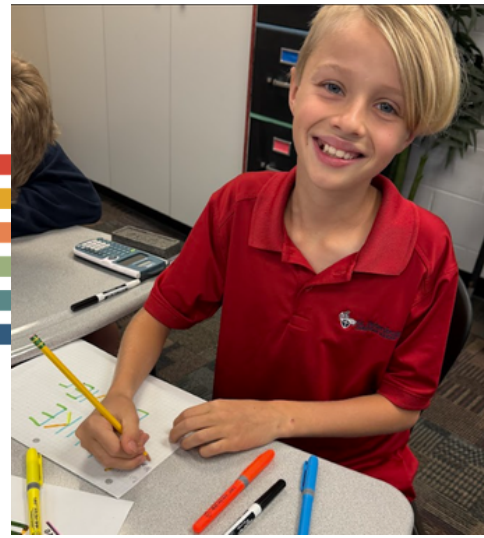

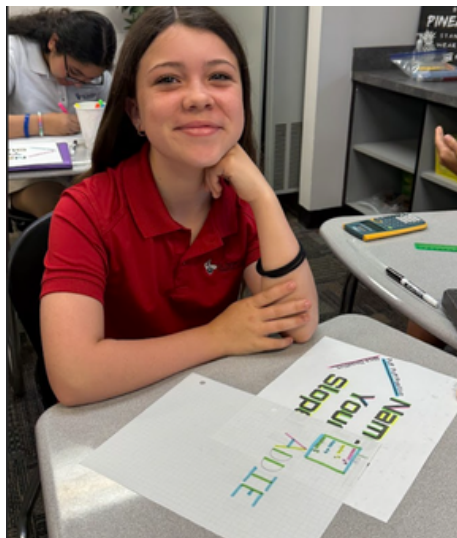

MIDDLE SCHOOL MATH

Recently, students learned to build and graph proportional relationships and how to identify a proportional relationship from a graph.

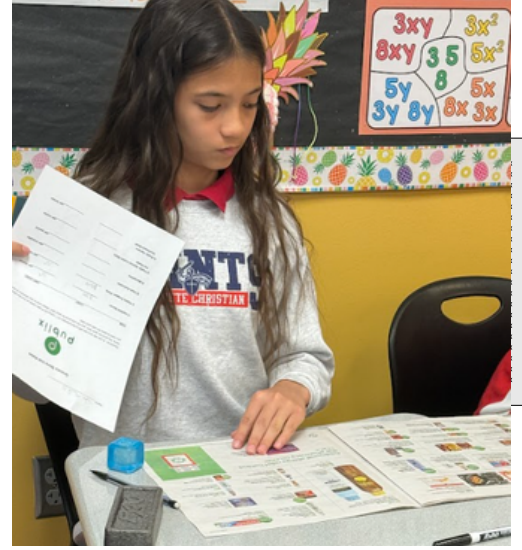

Pre-Algebra students learned the four types of slope in linear equations and then created their names using the four types of slope, identifying each slope they used with a color-coded key.

They also spent time shopping for groceries in a Publix flyer. They had to find the cost for the items on their list and then find the unit rate for each item.

RECEIPT

Thank you for shopping!

5TH GRADE SPECIAL PROJECT

This week, students placed painted rocks around campus as part of a class project focused on encouragement, kindness, and sharing positive messages with others. The rocks included inspirational words, faith-based messages, and simple notes meant to bring a smile to someone's day.

MISS DORSETT'S CLASS

After finishing the 7 books in the *Mercy Watson* series, Miss Dorsett's Kindergarten class enjoyed the same thing that Mercy the pig loves - buttered toast!
